

2021 NGTL System Expansion Project

Natural gas pipelines

Sonya Kirby

VICE PRESIDENT, CANADA GAS PROJECTS

Sonya leads the growth of TC Energy's natural gas delivery infrastructure across the country and welcomes you to our very first virtual open house.

“ Hi, I'm Sonya. As Vice President, Canada Gas Projects at TC Energy, it is my team's responsibility to ensure the safe and responsible development of natural gas pipelines and facilities across Canada.

Guided by our values of safety, integrity, responsibility and collaboration, we're proud of the positive relationships we have built and maintained with our neighbours over the past 65 years. NGTL pipelines are built and operated within a world-class regulatory environment and we are proud to be an industry leader in safety, reliability and community engagement innovations. Ensuring landowners, Indigenous groups and communities are engaged and respected in our project activities is essential to our success.

Our response to the COVID-19 pandemic has meant adjusting the way we conduct some aspects of our business, including engagement. The Virtual Open House for the 2021 NGTL System Expansion Project is a first for us, and it reflects our commitment to maintaining our connection with communities during these unprecedented times.

We invite you to learn more about the Project and reach out to us if you have any questions, feedback, or ideas for our team. Thank you for visiting and we look forward to hearing from you. ”
