

2021 NGTL System Expansion Project

# Project overview

## Tammy Manz

SENIOR PROJECT MANAGER

Tammy is here to tell you more about our focus on safety and our commitment to building strong external relationships on behalf of the Project.

“ Hi, my name is Tammy and I am a Senior Manager on the 2021 NGTL System Expansion Project. Welcome to our very first Virtual Open House!

At TC Energy, safety is our number one value, and our first concern is keeping all our employees, families and communities safe, especially during these unprecedented times. That is why we have developed this innovative virtual engagement space—to ensure you have the opportunity to learn more about the Project and connect with us.

We invite you to explore the virtual open house and view the interactive map that provides more details on location and the route of our project sections. You can also follow the links provided for more information on important project topics like our engagement with Indigenous groups, community participation, and how we manage our environmental footprint.

Thank you for visiting. Hopefully, when we can safely connect again in-person, you'll meet some of the Project team in your community. Until then, please get to know a few of our subject matter experts by clicking on their profiles and use the feedback forms provided to submit any questions you might have. ”
